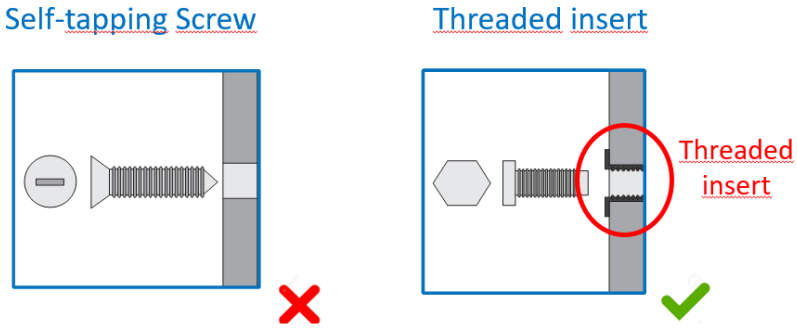
1. Under-worktop cabinet for Chemicals Storage – dim. 1200 mm

Series: *chemi*GUARD ; model: CMG-120-SP; Outer Dimensions: mm 1200x500x736*
(* Height may vary according to the model)

a. Configuration: 2 wing doors;
b. *chemi*GUARD cabinets are certified acc.to European Norm **EN ISO 16121**;
c. Certification is issued by Internationally recognized Third-Party Certification Authority (Bureau Veritas) given the successful outcome of all required tests. Multiple and regular inspections are performed so to grant the continuous quality and respect of Standard across the time;
d. Cabinet is realized with **exclusive** employment of steel, with no use of laminate/wooden panels allow a **100% fire-resistant** structure;
e. **Epoxy-powder coating** in thermal tunnel for best chemical resistance *(Standard colors: RAL 7035 + RAL 2008);*
f. Assembly of structure is achieved through **threaded inserts**, pressure-applied to the steel sheets, and with **no use of self-tapping screws:** this grants no loosening of the holes following to re-assembly of the furniture with possibility of **virtually infinite re-configurations**;



g. Height-adjustable threaded feet for perfect levelling of the cabinet, also in case of uneven floor;
h. No. 1 tray-shaped metal shelf, height-adjustable, realized in epoxy powder coated steel;
i. Collection tray located at the bottom of the cabinet, for collecting possible spills from the shelves;
j. **Magnetic closure** system + lock with key;
k. Flush black handle on the doors' front;
l. Pre-arranged for connection to air exhaust system, in the back of the cabinet;
m. Doors open at 110° so to allow full extraction of the tray-shaped shelves;
n. Front grid (with embedded dust filter) for proper air ventilation – DN 50 mm;
